

Fuel cell power module twinbox

Highly integrated and compact system solution for fuel cell-electric commercial vehicles

Advanced **technology**

that contributes to climate-neutral mobility

- Scalable solution thanks to modular design
- Driven by time to market first fuel cell system for heavy commercial vehicles in series production
- Sophisticated fuel cell stack technology with more than 5 million vehicle kilometers covered
- Due to robust design and durability, the fuel cell power module is particularly well suited to commercial vehicles' requirements

Compact **design**

Highly integrated system solution for fuel cell-electric commercial vehicles
